

## Re-opening of Laffitte Risk Arbitrage

Paris, 06/16/2009

Laffitte Capital Management is pleased to inform you the re-opening of its Merger Arbitrage Fund which had been suspended following the fail of its Prime Broker Lehman Brothers International (Europe).

« We thank our clients for their support and patience that they showed during this difficult time. Their presence close to us is rewarded today. Since the inception of the company, we choose to develop our Funds in a French regulated frame which is more protective for our clients. This choice allowed them to cross the last months of instability on the markets and to get a return of more than 10% since the beginning of '08. The Fund will now profit from a clear recovery of the M&A deals especially in the United States. This recovery will allow us to come along with our clients again by proposing an alternative asset management linking performance and security », comments Eric Robbe, Chairman of Laffitte Capital Management.

The company is expanding its commercial development and will launch in September an Event Driven Ucits type Fund.
